Customer agrees to provide all mail, parcels, and items for handling by Marana Group in accordance with services for which Marana Group has been engaged. Customer acknowledges that provision to Marana Group of any mail, parcels, or other items for handling of that fails to meet the Service Requirements may result in processing delays, additional handling charges, additional carrier charges, additional postage charges, Postal Service penalties, or some combination of all of the aforementioned.

#### 9. **QUALITY CONTROL ISSUES AND ADDITIONAL CHARGES:**

Self-metering customers (**MeterPlus™**, **SortMax™**, or **Mail Express™**), whose mail fails to meet the requirements detailed in the DMSTC and the specific Service Requirements for the service utilized, that is identified by Marana Group's quality control procedures, but meets the minimum mailing requirements of the Postal Service will be removed from the processing stream (e.g. missing postage, incorrect postage applied, automation compatibility, insufficient postage applied, etc.). These items will be corrected, as required, and mailed as appropriate provided the Customer has established a Prepaid Fund Account and maintains a positive (credit) balance. The Customer may be invoiced a fee for correction and all applicable postage costs. Customer agrees to reimburse Marana Group for such costs within Marana Group's normal payment terms. All such charges will automatically be withdrawn from any Prepaid Fund Account that the customer may have established.

If the Customer does not establish or maintain a Prepaid Fund Account, all such mail found to be in error will be pulled from the processing stream and returned to the customer the next business day as part of the normal mail collection cycle.

Mail that fails to meet the requirements detailed in the DMSTC and the Service Requirements that is identified by Marana Group's quality control procedures, but does not meet the minimum mailing requirements of the Postal Service, will be returned to the Customer the next business day. This will specifically *exclude* stamped, Business Reply Mail, and full postage letters, flats, and parcels, all of which will be delivered to the Postal Service without review, comment or correction by Marana Group.

Mail that fails to meet the requirements detailed in the DMSTC and the specific Service Requirements for the service utilized, that is not identified by Marana Group's quality control procedures until after it has been processed into the mailstream, and is part of a larger mailing, must be corrected prior to submission to the Postal Service. These items will be corrected, as required, and mailed as appropriate regardless as to whether the Customer has established a Prepaid Fund Account and maintains a positive (credit) balance. The Customer may be invoiced a fee for correction and all applicable postage costs. Customer agrees to reimburse Marana Group for such costs within Marana Group's normal payment terms. All such charges will automatically be withdrawn from any Prepaid Fund Account that the customer may have established.

For all services, material provided by the Customer for processing, that does not adhere to the instructions detailed in the DMSTC or Service Requirements, including Postal Service Move Update requirements or carrier requirements, may be subject to processing delays, additional handling charges, additional postage costs, service penalties imposed by the Postal Service or other carriers, or some combination of all four. The Customer will be invoiced for such charges and agrees to reimburse Marana Group for such costs within Marana Group's normal payment terms. All such charges will automatically be withdrawn from any Prepaid Fund Account that the customer may have established.

**10. SERVICE INTERRUPTIONS:**

It is the intent of Marana Group with respect to all services detailed in this DMSTC to provide the most expeditious handling of the Customer's material. In the event that a service interruption or other event occurs, outside of the control of Marana Group, that prevents Marana Group from processing the Customer's material using the agreed upon method, or at the agreed upon postage or carrier rate, Marana Group will, if possible and at its sole discretion, apply additional postage or carrier fees as may be necessary to render such items to the Postal Service or other carrier for delivery. Marana Group will not assess an additional handling fee for this service but will charge the Customer for all additional postage or carrier costs. Customer agrees to reimburse Marana Group for such costs within Marana Group's normal payment terms. All such charges will automatically be withdrawn from any Prepaid Fund Account that the customer may have established.

The Customer may elect to have Marana Group hold their material until such time that service interruption or other event that prevented the use of the agreed upon method, or the achievement of postage or carrier discounts can be resolved. Such elections can be made by providing Marana Group with such instructions in a letter on the Customer's letterhead and signed by an authorized agent of the Customer. By electing this option, the Customer acknowledges that delivery of mail and parcels will be delayed and that such delay may exceed the total time of the original service interruption.

**11. LIMITATION OF LIABILITY:**

MARANA GROUP IS NOT RESPONSIBLE FOR DELAYS IN PROCESSING CAUSED BY ANY CARRIER OR PROCESSING PARTNER. SUCH DELAY WILL NOT BE CONSIDERED A DEFAULT BY MARANA GROUP. THE MAXIMUM LIABILITY OF MARANA GROUP IS LIMITED SOLELY TO THE COST OF THE WORK PERFORMED. IN THE EVENT OF A DEFAULT BY MARANA GROUP, MARANA GROUP SHALL AT NO COST RE-PROCESS AND/OR RE-MAIL AT THE SAME LEVEL OF SERVICE, A CORRECTION OR A CORRECTED JOB AS NECESSARY TO REMEDY THE DEFAULT OR, ALTERNATIVELY, REFUND TO CUSTOMER THE AMOUNT PAID FOR THE DEFAULTED JOB, PLUS APPLICABLE POSTAGE AND SHIPPING CHARGES. IN NO EVENT WILL MARANA GROUP BE LIABLE FOR ANY INDIRECT, INCIDENTAL, SPECIAL, CONSEQUENTIAL, PUNITIVE, OR SIMILAR DAMAGES, INCLUDING, BUT NOT LIMITED TO, LOST PROFITS, LOSS OF DATA, OR BUSINESS INTERRUPTION LOSSES. Whereas Marana Group is bound to adhere to Postal Service or carrier regulations with respect to volume counts and other quality issues, it shall be the policy of Marana Group to rely on data generated by its machinery and software, as submitted to, and verified by, the Postal Service, processing partners, or other carriers, as the true and accurate volume count for all supporting reports and invoices provided to Customer. Marana Group will not investigate, review, or adjust any volume count, report, or invoice charge of any service that is audited by the Postal Service or other carrier wherein the volume in question varies by less than +/- 2% of the total volume submitted for the Customer for the given mailing, invoice period, project, or report.

**13. POSTAL SERVICE, PROCESSING PARTNERS, AND CARRIER ACCEPTANCE TIMES, LOCATIONS, AND REGULATIONS:**

## 20. NCOA<sup>LINK</sup> MPE PROCESSING SERVICES:

Marana Group is a non-exclusive Licensee of the USPS® (United States Postal Service®) to provide NCOA<sup>LINK</sup> MPE processing.

MPE Data Users receive the full 18-month data set provided weekly under direct license from the USPS.

The full NCOA<sup>LINK</sup> file is a consolidated file of move information that on average contains approximately 160 million permanent changes-of-address (COAs) filed with the United States Postal Service (USPS). These COAs are retained on the file for a four-year period from the move-effective date and the file is updated weekly.

Before being added to the NCOA<sup>LINK</sup> file, the **Old** address supplied by the Postal customer must be ZIP + 4 coded. The **New** addresses must be ZIP + 4 coded and validated using the USPS' proprietary database of actual delivery points. (NOTE: The delivery point database does not include NAMES or COA information.) Each delivery point confirmed **New** address is included on the NCOA<sup>LINK</sup> file. If unable to validate the **New** address, the NCOA<sup>LINK</sup> MPE process will indicate that a move exists but will not provide the undeliverable **New** address.

**New** address information is provided only when a match to the old name and address is attained. The typical profile of the **New** address information contained on the NCOA<sup>LINK</sup> file is as follows:

- 89.68% Forwardable moves containing delivery point confirmed **New** addresses—**New** address provided
- 1.19% Moves containing unconfirmed **New** addresses - **New** address not provided
- 7.44% Moved, Left No Address\*\*
- 1.63% PO Box Closed\*\*
- 0.06% Foreign Moves\*\*

\*\* The literal "NEW ADDRESS INFORMATION UNKNOWN" is provided in lieu of address information for Mailpiece Facsimile, Notification via Returned Mailpiece, DBCS and Flats processing only.

When possible, postal customers who move multiple times within the NCOA<sup>LINK</sup> time period are "linked" or "chained" to ensure that the latest address is furnished when an NCOA<sup>LINK</sup> match is attained. This is not always possible if subsequent COAs are not filed in exactly the same manner as a COA filed previously (e.g. name spelling differences or conflicting secondary information).

The provision of change-of-address information is controlled by strict name and address matching logic. NCOA<sup>LINK</sup> MPE processing will only provide new address information when queried with a specific algorithm of the name and old address from a mailers' mailpieces, which matches the information on the NCOA<sup>LINK</sup> Product. Data contained in and information returned by the NCOA<sup>LINK</sup> MPE process is determined by the name and move type (Business, Individual, or Family) indicated on a Postal customer's Change-of-Address form.

The presentation of name order is established using a pre-process before querying the NCOA<sup>LINK</sup> database. However, there are no restrictions on using a process to interchange the name order to yield the best possible results using the NCOA<sup>LINK</sup> database. It is ultimately the responsibility of the Mail Owner working with the Licensee to determine the name order presentation correctly.

The data contained within the NCOA<sup>LINK</sup> Product is comprised of approximately 40% family moves, 54% individual moves, and 6% business moves.

All matches made to the NCOA<sup>LINK</sup> file require a ZIP + 4 coded, standardized old address.

There are five separate and distinct services that may be provided to a mailer by the NCOA<sup>Link</sup> MPE Licensee. These services fall under the NCOA<sup>Link</sup> MPE Active mode of processing, in which the address information is returned or sprayed on mailpieces only when there is updated COA information.

- **Forwardable Mailpiece** - Processing in which mailpiece redirection due to customer moves via the Licensee's NCOA<sup>Link</sup> Mail Processing Equipment.
- **Notification Via Returned Mailpiece** - Processing in which updated COA information is sprayed on mailpieces and returned to the mailer via hardcopy or photocopy mailpieces.
- **Mailpiece Facsimile** - Processing in which updated COA information is sprayed directly on mailpiece facsimiles and returned to the mailer.
- **DBCS (Delivery Barcode Sorter)** Processing of letter mail on DBCS equipment in which no COA information is sprayed on mailpieces. Mailpieces are outsorted to a bin designated for UAA mail and either returned to the mailer or destroyed.
- **Flats** - Flats processing in which mailpiece redirection due to customer moves via the Licensee's NCOA<sup>Link</sup> Mail Processing Equipment. Can be processed in the following modes: Forwardable Mailpiece; Notification via Returned Mailpiece; and Mailpiece Facsimile. If flat mailpieces are processed on equipment in which COA information is unable to be sprayed on the mailpieces, mailpieces are either returned to the mailer, destroyed or mailed at full rate.

The USPS has established a process called the "Rules Table." This process will produce matches that otherwise would not be possible, i.e. JOHNY and JOHNNY.

All nickname possibilities are derived from a standard USPS nickname list. In considering alternate presentations of an input name and address do not match to the NCOA<sup>Link</sup> file and alternative queries are attempted, any variations which obtain NCOA<sup>Link</sup> matches may be provided to the NCOA<sup>Link</sup> MPE customer for analysis, depending on the mode of processing.

When a match or a near match of an input name and address to NCOA<sup>Link</sup> MPE Product is identified, a report of the standard NCOA<sup>Link</sup> return codes may be provided by the MPE Data User, upon customer request. This report indicates the type of match made or the reason that a match could not be made.

MPE Data Users must offer the standard output format of the NCOA<sup>Link</sup> MPE process to customers, if requested, with no file manipulation by the Data User.

NCOA<sup>Link</sup> MPE processing has the potential to reduce returned mail, yet the USPS does not make any guarantees, express or implied, on the reduction of such mail. Thus any costs associated with returned mail are the Licensees' and/or their customers' sole responsibility.

An NCOA<sup>Link</sup> MPE customer with questions about the specific results returned from an NCOA<sup>Link</sup> MPE process must first contact the processor for explanation and resolution.

Prior to the processing of NCOA<sup>Link</sup> MPE data, every customer must have completed and returned to their NCOA<sup>Link</sup> MPE Data User Licensee the "NCOA<sup>Link</sup> MAIL PROCESSING EQUIPMENT PROCESSING ACKNOWLEDGEMENT FORM" provided to them by their Licensee. It is inappropriate to misrepresent any of the information on the form. Punitive action will be taken by the USPS if the customer or licensee is found to have knowingly supplied false information. Depending on the severity of the offense, actions may include litigious or even criminal charges being brought against the offender.
